Response On Success	<pre>{ "BusinessState": { "BusinessStatus": 0, "BusinessErrors": [] }, "Data": { (The updated inquiry) } }</pre>
----------------------------	--

Response On Error	<pre>{ "BusinessState": { "BusinessStatus": 2, "BusinessErrors": [[List of BusinessErrors]] }, "Data": null } }</pre>
--------------------------	---

Service Logic

Authentication

Instead of user authentication, we manually authenticate the service, with the parameter "InboundKey". This acts as a secret key, sent once to each caller that wants interaction with OD DSW. This key is provided by the OD Partner / Consultant upon request.

Business Partner Type (Company/Private)

If the field Company Name is empty/null, we treat the Business Partner as "Private". In the opposite case, we treat the BP as a Company, while the fields firstname/lastname act as the main contact's data.

Branch Assignment

In order for the service to work, it is mandatory that a branch code is provided. We offer a service that exposes all the related Branch Codes-Descriptions.

Note that in OD (has nothing to do with the service call) we configure in the backoffice, what employee will receive what inquiry based on the branchid/inquirytype.

Direct User Assignment

If the field "PreferredUserId" is filled, then the system overrides any possible Branch Assignment (described above) and directly assigns the inquiry to this user. *The user id refers to the actual user (OUSR) entry in OneDealer.*

Interest CaseType

The interest type of the inquiry is found in the CaseType field, while the actual inquiry object is sent to the Interest field.

CaseType	Interest Type	Notes
0 (Unknown)	String	The Interest field will be used as a note that will be displayed to the OneDealer user in the inquiry receival process
6 (StockVehicle)	String	The interest field contains a vehicle id, existing in the OneDealer database (The primary key of the vehicle record).
200 (VehicleContract)	VehicleInquiry	

Campaign Source

If the inquiry is originated from a campaign, the service can be filled with the relevant campaign id (string) in the CampaignId field. The ReferralCampaignHash is also used, as a buffer that can hold parameters that will be recorded 'as-is' to the inquiry object, for future use by the external campaign system (they have no meaning for OneDealer, we just transfer the data, for the convenience of the campaign system)

Inquiry Services

Update Conditions

When calling UpdateInquiryInterestByCase the update will fail if the following conditions are not met:

- 1) If the Type of the Interest to be updated is a Vehicle Contract or Stock Vehicle
 - a) Update the Interest only if its status is any of
 - i) Generated
 - ii) Person Qualified
 - iii) Interest Qualified
 - iv) Qualified
- 2) If the Type is anything else
 - a) Update the Interest only if its status is any of
 - i) Generated
 - ii) Person Qualified

Entity Definitions

Request Body

Property Name	Type	Mandatory	Notes
Inquiry	InquiryObject (for Creation) or InquiryObject (for Update)	Yes	The same object for either CreateInquiryInterestByCase or UpdateInquiryInterestByCase but with different property requirements

InquiryObject (for Creation)

Property Name	Type	Mandatory	Notes
Interest	Depends on Interest CaseType	Yes	The VIN of the vehicle. It is expected that there is a vehicle in OD that matches with this VIN
CaseType	Integer	Yes	See Interest CaseType
CompanyName	String	No	See Business Partner Type (Company/Private)
FirstName	String	No	See Business Partner Type (Company/Private)
LastName	String	No	See Business Partner Type (Company/Private)
Email	String	No	
Phone1	String	No	Must be sent with a country prefix.
Phone2	String	No	Must have no spaces between the prefix and the actual number.
MobilePhone	String	No	(Example format: "{CountryPrefix}{PhoneNr}")
Language	String	No	
CampaignId	String	No	See Campaign Source
ReferralCampaignHash	String	No	See Campaign Source
BranchCode	String	Yes	See Branch Assignment
InboundKey	String	Yes	See Authentication
Street	String	No	
StreetNo	String	No	
ZipCode	String	No	
City	String	No	

Inquiry Services

CountryCode	String	No							
Block	String	No							
BuildingFloorRoom	String	No							
State	String	No							
PlaceType	PlaceTypeEnum	No	<table border="1"> <tr> <td>1</td> <td>Home</td> </tr> <tr> <td>2</td> <td>Work</td> </tr> <tr> <td>3</td> <td>Unknown</td> </tr> </table>	1	Home	2	Work	3	Unknown
1	Home								
2	Work								
3	Unknown								
Notes	String	No							
PreferredUserId	Integer	No	See Direct User Assignment						
ContactDataPrivacy	DataPrivacyObject	No							
Details	List<Custom Fields >	No							

InquiryObject (for Update)

Property Name	Type	Mandatory	Notes
Interest	Depends on Interest CaseType ¹	Yes	The VIN of the vehicle. It is expected that there is a vehicle in OD that matches with this VIN
Code	String	Yes	The Code of the Inquiry Interest CaseType

DataPrivacyObject

Property Name	Type	Mandatory	Description
AllowContactBySMS	Boolean	No	
AllowContactByPhone	Boolean	No	
AllowContactByEmail	Boolean	No	
AllowContactByPost	Boolean	No	

VehicleInquiry

Property Name	Type	Mandatory	Notes
VIN	String	Yes	The VIN of the vehicle. It is expected that there is a vehicle in OD that matches with this VIN
ExternalSystemInquiryURL	String	No	A public URL of the inquiry, as it may exist in the calling system

¹ The CaseType of the Interest on Update is fetched from the database. There is no need to send it in the request

Entity Definitions

ExternalSystemInquiryID	String	No	The ID of the inquiry in the external calling system.
TradeIn	TradeInVehicle	No	The trade in vehicle object
ExtraVehicleInquiryItems	List<ExtraVehicleInquiryItem >	No	
FinancialInformation	FinancialInformation	No	
PaymentInformation	PaymentInformation	No	

TradeInVehicle

Property Name	Type	Mandatory	Description
Make	String	No	
Model	String	No	
VIN	String	No	
ReleaseYear	Integer	No	
FuelType	String	No	
GearType	String	No	
ExteriorColor	String	No	
InteriorColor	String	No	
Upholstery	String	No	
Mileage	Integer	No	
CustomerExpectation	Double	No	
NumberOfPreviousOwners	Integer	No	Number of previous owners
Images	List<String>	No	Trade-in images. Absolute URLs.

ExtraVehicleInquiryItem

Property Name	Type	Mandatory	Description
ItemDescription	String	Yes	The name of the item
ItemType	String	No	The type of the item (for example: Offer Benefits)
Price	Double	No	The price of the item
Currency	String	No	The currency of the item. Just a description.

FinancialInformation

Property Name	Type	Mandatory	Description
FinancingType	String	No	
FinancingCompany	String	No	
Duration	Integer	No	Duration in months
ContractStartDate	DateTime	No	
ContractEndDate	DateTime	No	

Inquiry Services

DownPaymentPercentage	Double	No	
DownPaymentAmount	Double	No	
MonthlyInstallmentPercentage	Double	No	
MonthlyInstallmentAmount	Double	No	
RemainingValuePercentage	Double	No	
RemainingValueAmount	Double	No	
FeeAmount	Double	No	
Currency	String	No	Just a description of the currency used

PaymentInformation

Property Name	Type	Mandatory	Description
RecommendedRetailValue	Double	No	
FullVehiclePrice	Double	No	Price including extra items/benefits etc.
DiscountAmount	Double	No	
ServiceContractAmount	Double	No	
TradeInAmount	Double	No	
OnlinePaymentAmount	Double	No	
TotalPayment	Double	No	
Currency	String	No	Just a description of the currency used

Custom Fields

To cover requests that have custom fields, you can fill the 'Details' list with the following object structure:

CustomField			
Key	String	Name of the field	Mandatory
Value	Object	Value of the field. Any type of value can be inputted here but each Key, has been setup in the back-office of OD to support a specific type. The available value types are: <ul style="list-style-type: none"> • String • Integer • Decimal • Date • Blob (for sending HTML/base64 files etc) 	Mandatory

The available custom fields are generated per-request, per-project.
