Campaign User Role Linking

Navigate to the Campaign Users list (url: https://functional-test-tgh.onedealet.com/SetupEntities/List/Administration/IDMS_CAMPAIGNUSER) either manually or from the menu.

Either edit or add a new entry by clicking in the plus button.

The screenshot shows a web application interface for managing campaign users. At the top, there is a navigation bar with a search bar and a plus button. Below the navigation bar, the page title is "List of Campaign Users" with a sub-header "IDMS_CAMPAIGNUSER". A plus button and an "Actions" button are visible. The main content area displays a table with two entries. The table has four columns: "User Login ID", "Email", "CM Role UID", and "User Token". Each row has a dropdown arrow on the right side.

User Login ID	Email	CM Role UID	User Token

The popup contains the following fields:

- **User Login ID**: This will open a list where the user selects what OneDealer user he wants to give access towards the Campaign Management system.
- **CM Role UID (dropdown)**: Contains the available/selected campaign management roles.
- **CM Role UID (Free-Text)**: This field is only used if the value is not found in the above mentioned dropdown. In the future we will provide an editor for the CM roles, so this field will be deprecated and removed.
- **User Token**: This value acts as a handshake authorization key between OneDealer and the Campaign system. Any (non-empty) value is valid. You do not have to communicate this to anyone, Lighthouse is provisioned with the resources needed in order to read this token offline. In short: Just put any nonempty value here and our mechanism takes care of the rest.
