#Option	Activity	Scope	Includes	Deliverables/Assumptions/Prerequisites
0	ODIL Implementation Kickoff	Overview and Setting Up ODIL Integration Project	<ul style="list-style-type: none"> - Architecture overview - Communication patterns - Authorization patterns - Integration Process 	Day 1 : <ul style="list-style-type: none"> - project relationship-roles / stakeholders map /Point Of contact - Scope Deliverables - ODIL Overview / Architecture -Tools / Processes overview and working principles - Setting Up Integration Project and Tools and walkthrough - Baseline Project Plan
0	ODIL APIs Detail Scope Definition	Detail Review APIs and integration Process Identify any major GAPS	Technical & Functional API review Hands-on on API tools usage Identify GAPS / Risks Outcome : Project Scope / Issues Tracker	Day 2: <ul style="list-style-type: none"> ' - Detail APIs Documentation Walkthrough -OD Process (performed by OD Team) -API services and entities detail review - Swagger API demonstration / use /testing - Identify GAPS / Risks /Actions (per API)
0	ODIL APIs Integration plan	Lock Scope & Project Plan	Scope Mgmt. (APIs , Issues , GAPS , Risks) Integration Project Plan	Review ODIL knowledge base for scope mgmt. . Review any Integration Issues with Partner Solution - compatibility review Agree GAPS, Issues, Risks and action plan. Prepare project plan and with schedule.
1	Setup Dev/Test environment	Option 1: Partner EndPoint with Existing OD Environment	<ul style="list-style-type: none"> - Partner Backend Account , Authentication configuration and verification - Partner endpoint (ODILext) APIs provisioning. - Partner Solution communication is established & tested with EndPoint. -Static Mappings based on Std Inventory values 	- ODIL Partner endpoint established with existing backend OD env
2		Option 2: Partner EndPoint with New OD Environment	<ul style="list-style-type: none"> -OD Environment Backend Registration and Communication Establishment and Testing - Partner Backend Account , Authentication configuration and verification - Partner endpoint (ODILext) APIs provisioning. - Partner Solution communication is established & tested with EndPoint. -Static Mappings based on Std Inventory values 	- ODIL Partner endpoint established with new backend OD env.

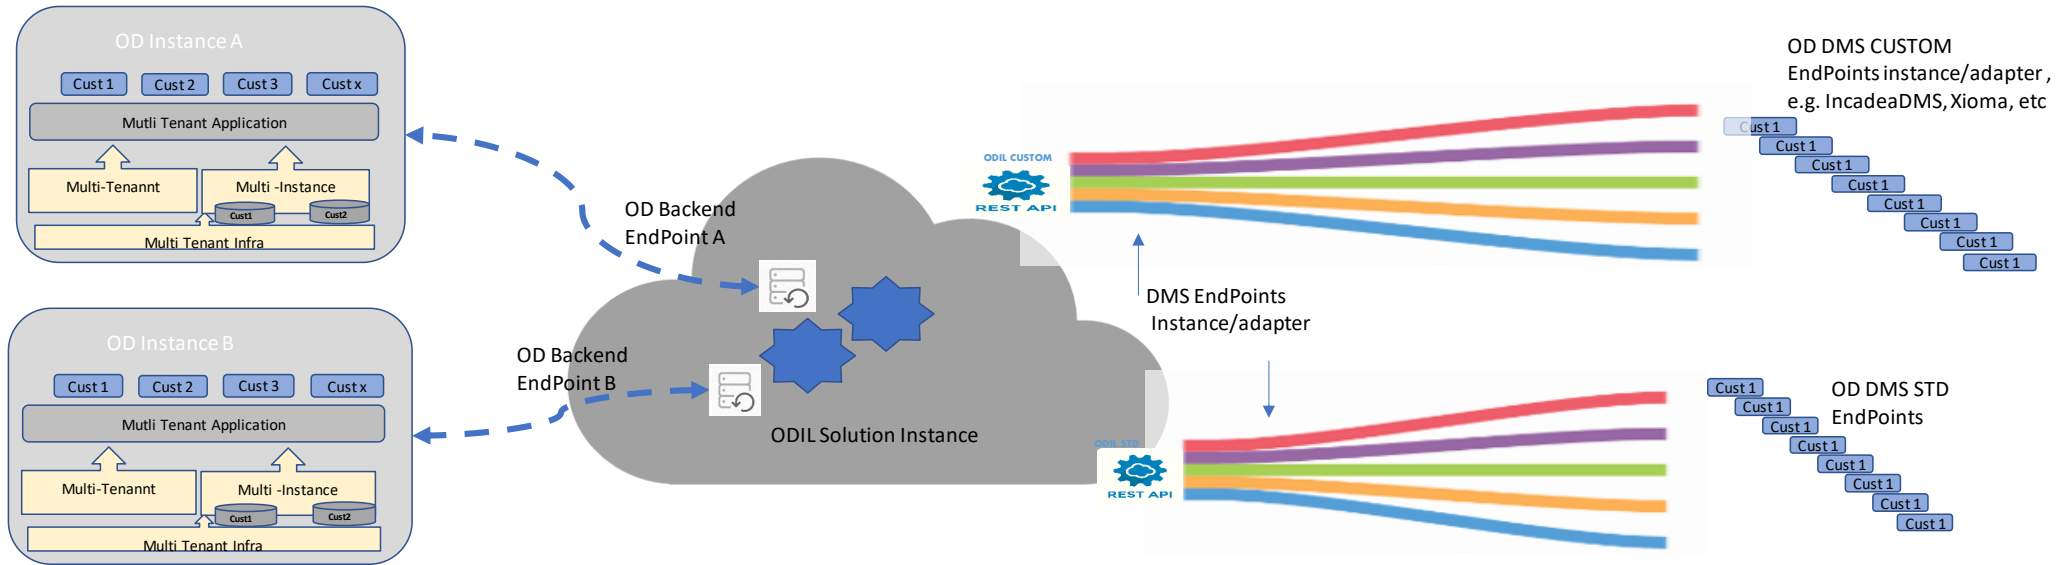

On Boarding Activities (Partner)

#Option	Activity	Scope	Includes	Deliverables/Assumptions/Prerequisites
0	Project Mgmt. & support	Technical Support / Project Mgmt.	<ul style="list-style-type: none"> - Regular ongoing check points for the project development status reviews. - Technical forum to clarify Tech Questions related to project implementation 	<ul style="list-style-type: none"> - project status reviews / status updates - answers on Technical Questions - How /To
0	Integration SIT & Certification	SIT testing and Certification	<ul style="list-style-type: none"> - SIT Integration Testing - Integration Certification / Close Down 	<ul style="list-style-type: none"> - SIT and Certification upon successful completion of SIT Testing - corrective Action Plan and certification process Remarks : <ul style="list-style-type: none"> - failed SIT will trigger the repetitive SIT process with same efforts - SIT activities exceeding the planned efforts will be charged on T&M

On Boarding Activities (Partner)

Deployment Scenarios

Deployment components	Purpose
ODIL DMS EndPoint	Establish Dealer Communication with OD Backend based on existing ODIL DMS Instance . Prerequisites ODIL Solution Instance exists / OD Instance Exists / ODIL DMS Instance exists
OD Instance Deployment	OD Instance EndPoint Configuration
ODIL DMS Custom endpoint instance/adaptor	DMS EndPoint Custom Instance (custom interface) has been build and Certified (OnBoarding) , usually includes a custom adapter to support the DMS integration logic of the system used by Dealers i.e. Incadea. Lifecycle of 3rd Party system has been agreed and included in the Partner System Contract and includes backwards compatibility model .
ODIL Instance Deployment	Deployment of ODIL instance for a) Geographical Coverage i.e. APAC , AMERICAS etc., or b) OEM with Multiple Dealers request for integration Private instance

Deployment Scenarios

Thank you!!!
