

DAY-3

Vehicle of Interest

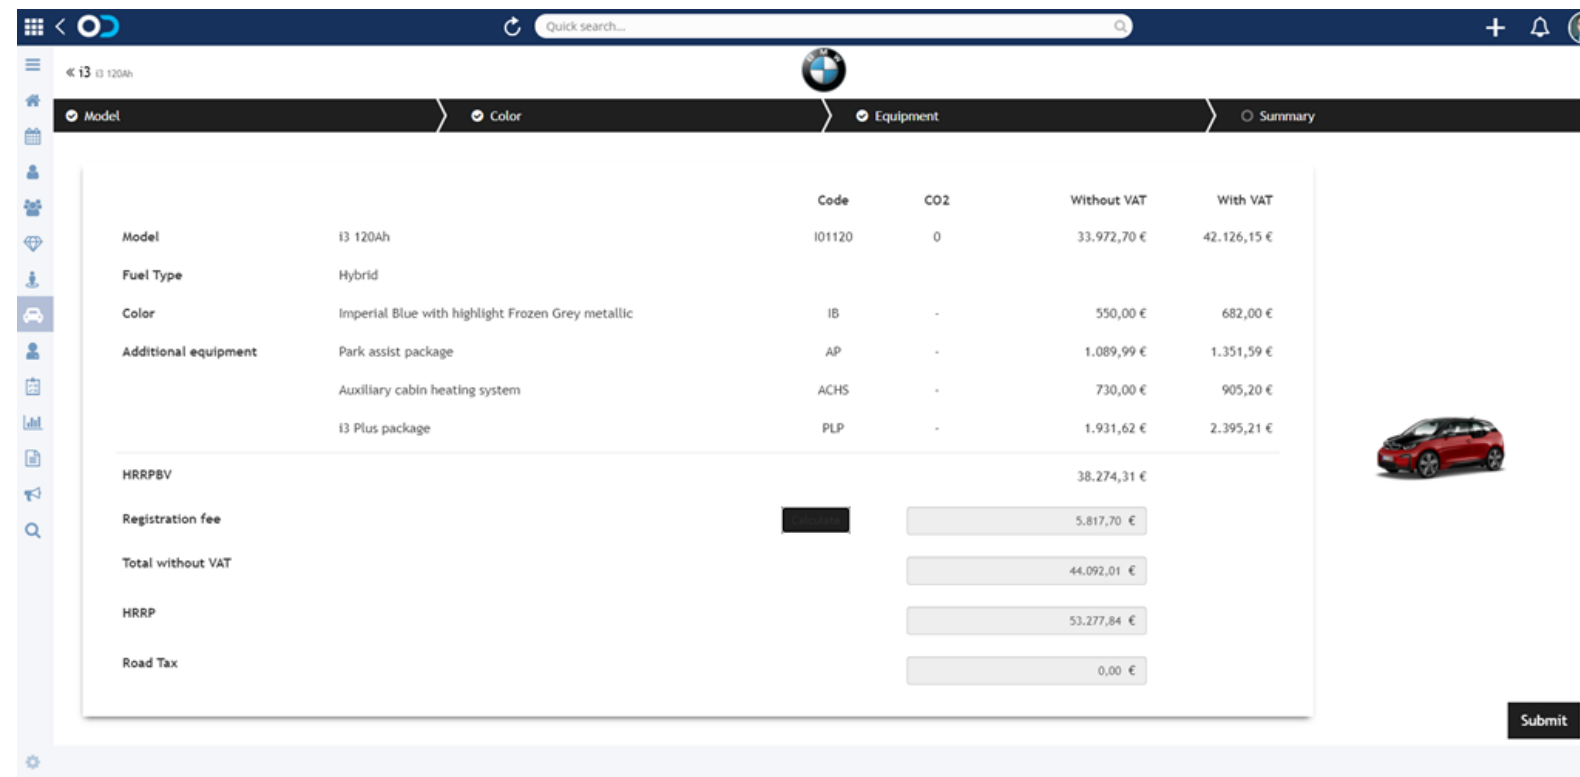

The VOI can be either an existing vehicle in the importer's or dealership's inventory *or* it can be configured using different tools (virtual vehicle)

- **Virtual**
 - **Configurators**
 - Light configurator (without dependencies)
 - Advanced Configurator
- **Vehicle in stock**
 - **Stock Locator** (Query to external system for one specific request or in DSW)
 - **Inventory** (vehicles stock existing in DSW and frequently updated via a service request or import of an excel file)

Before choosing any of the above possibilities to configure or to search for a vehicle, the user must select the **MAKE** (i.e. BMW, MERCEDES, VOLVO, VW, etc..)

Light configurator

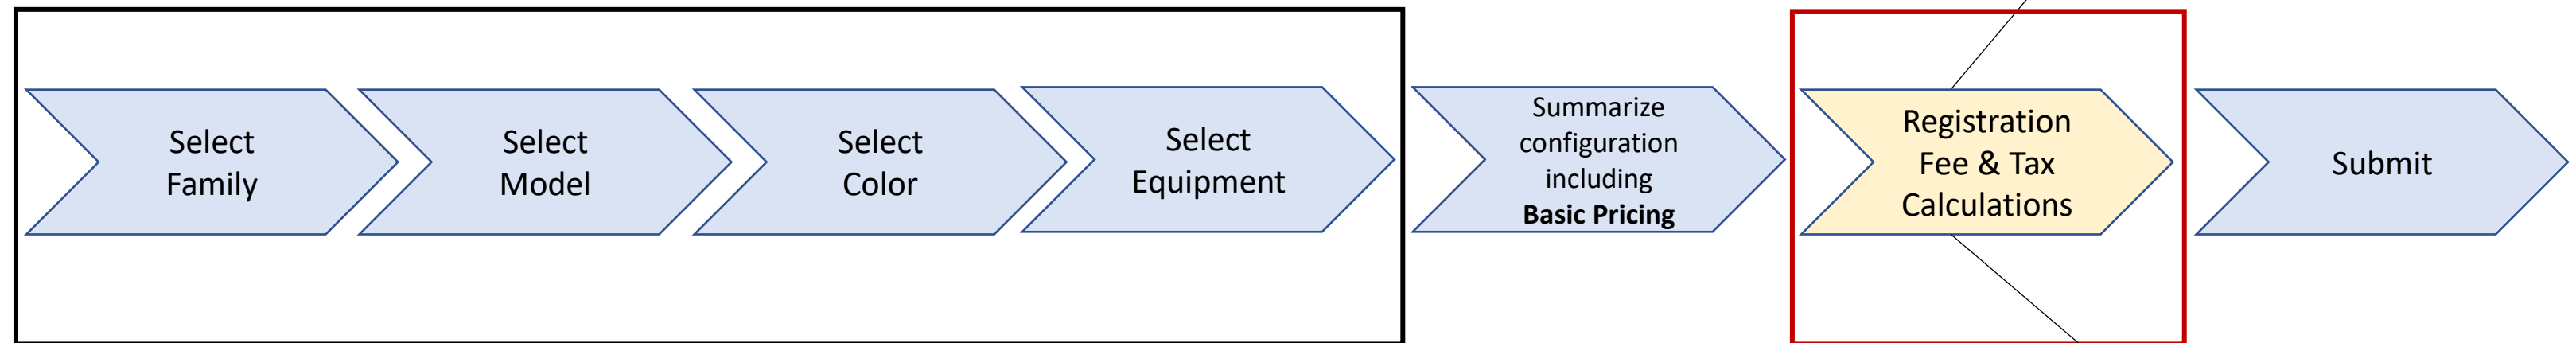

Before choosing the light configurator tool, the user must choose the **MAKE** for the VOI
 The Configurator is a web-based application however the data are maintained in DSW

The calculation is maintained in DSW

Setup for additional prices except the basic prices are maintained in DSW

Advanced Configurator

Before choosing the configurator tool, the user must choose the **MAKE** for the VOI

- This configurator is an external system, fully integrated with DSW.
- All the data used for the configuration of a VOI are maintained in the external system (Family, Model, Color, Equipment and Packages)
- The data-base with the data required for the configuration is maintained manually or by exchange data with DSW.
- There is a possibility to edit the data already uploaded to the configurator or import additional data from other systems
- The selection of colour, equipment and packages is controlled by dependencies.

Process overview

Stock locator

- The stock locator functionality is the selection of a particular vehicle from a list of available vehicles in stock in an external system, based on specific criteria given by the user.
- The make is selected before choosing the tool for searching the available stock
- The user types the desired criteria such as Family, Model, Colour, Gear Type, Fuel type, etc.. , the system generates a query in an external system and the vehicles satisfying the criteria are listed.

The screenshot shows a web application titled "Volkswagen Stock Locator". The interface includes a search bar at the top with the text "Quick search...". Below the search bar, there is a navigation menu on the left with icons for home, calendar, people, document, location, diamond, and car. The main content area displays the title "Volkswagen Stock Locator" and a dropdown menu for "All entries". Below this, it states "Found 28 entries". The search criteria are displayed in a grid format:

Make	Volkswagen	Family	Néo Polo	Model	AW13LZ - Polo 1,0 TSI 95PS DSG Comfortline
Model Description		Color		Interior	
Features		Gear Type	Any	Fuel Type	Any
Order Status Min	Any	Order Status Max	Any	Retail Price Min	
Retail Price Max					

At the bottom of the search criteria, there are buttons for "Rename", "Save", "Copy", "Delete", "Clear", and "Apply". Below the search criteria, a table lists the search results:

Implementation for
VW Importer in Greece

Inventory

With this option, the vehicles' stock is maintained in DSW database.

The stock is periodically updated as follows:

- Manually
 - Data-entry form
- Automatically
 - via a service (sync with an external system via the Integration Layer)
 - via an .xlsx file (import into DSW)
